Beloved in the Lord, I come unto you in this expression to bring these words of wisdom. My name is Kwan Yin. I come to share a word of advice and the many blessings of the divine heart of God. I sit upon the council board of the lords of karma, and there I have set for many thousands of years. I serve within the hierarchy of the Inner Light masters, and I serve as a link between the lords of karma and the inner light ones. I help to blend the energy from above down into the world

of manifestation to bring these words of wisdom to the lords of karma; to bring about balance and enlightenment to those that are caught upon the wheel - the wheel of reincarnation - the wheel of karma, of debt and balance.

I come to share, to help you understand better how we, the masters of inner light, do function, and why we function the way we do, and why each of you here are involved as well. Within the letter that Jim received yesterday and the words of advice, he spoke of a focuser of light. Each and every one of us is a focuser of light, for within each is the divine spark of God. As a divine spark, the light comes forth. It is the manifestation of God in that light as it comes in to the different realms and experiences and becomes aware of its creative nature. So truly, each of these vehicles, both here in the physical planes and those above in the spiritual, are actually focalizers of the divine expression of God. He focuses his light into these vehicles to express and to learn, and to become one with himself. So this is why we use the word focuser and focalizer in this way.

We, the masters of inner light serve as a focalizer as well. We have gone through many of the lessons of the lower planes as well as within the inner planes of spirit, and have merged back into at-one-ment in God. In that full at-one-ment, we have become co-creators, co-manifesters in the light of God, in the full awareness of God. In that state, we have moved beyond God itself. For God is a state of being, and we have moved out of that state of being, and we are. In that state, we are beyond reality of mind, of essence, of being. That is what we are. There is no way to put it into words. Until you come into full being in that divine essence, there will be no way for your mind or your emotions or your heart or your physical body to perceive. Know that the light

that we service from comes from the highest of realms. As focalizers, we come down into the different levels of creation and we each serve in our own way, stepping down that light energy so that those around us might perceive it better, receive it better, and understand it in the fullest light they are capable.

I serve upon the lord council of karma, and there I serve as a focalizer of the highest knowledge, to help bring about as much balance as possible in working out the different karmic patterns that all are having to function in. The soul that we are talking to at this time served upon this board as well. This is why I have a great link with this soul. But in order to fulfill a certain mission that needed to be done within the karmic pattern, he so chose to step down from the lord council, and come down to the physical planes to begin serving out a particular pattern of service to bring a certain group back into enlightenment that had lost it. So I, then, stepped in and fulfilled that board position

on the lord karma council. I, Kwan Yin, now sit upon that board and serve and function in bringing about balance. If you look closely, that tape that you listened to today was by no accident. We arranged it so that you could begin to see how we function, and that truly everything is by divine plan. We upon this board, have planned these plans of the Foundation and of the organization of spiritual movement for some time.

It is no quirk of spirit that you came together. It is by a great divine plan of spirit that all of this is taking place. Everything in its divine order in the divine plan unfolds according to the divine will if we allow it. Even times that we do not allow it within our own conscious mind, we have no control. Truly at times, you can see that in your own particular lives, your own personal lives, as well as your own outer

group life. There are certain activities that have manifested that you have had no decision within, but yet, they have influenced your life and the direction you have taken for all of eternity. So it is now, within the Foundation's activities and within this new spiritual group that a new direction is being taken, and the divine plan is being fulfilled.

Kwan Yin, myself, is a particular soul that has reached a particular enlightenment in the inner light plane. It is a plane beyond God itself, where all divine essence comes from. In total at-one-ment, those that have the creative knowledge of the God-self come back down into different planes of existence, become co-creators with that God-essence that is still striving to learn and understand itself. So we that have understanding of self, come down to give understanding to self. I serve upon the board of karma with the lords of karma, who serve on the physical planes, those being within the physical, the emotional, the causal, the mental, and the etheric, and throughout all the different levels of universes in those planes. The lord council sits upon a causal plane, and dwells there, serving with the different lords of those planes. The lords of karma are those lords of the different plane levels. I sit there with

them in conjunction, with their decision making, I bring in the greater light, and try to bring about a greater balance. Myself and two other individuals sit as the triune presence, trying to bring about a balance of their imbalance; trying to bring about a control within their uncontrolled thought. For they alone serve to hold man and the soul of man in bondage. We serve to bring about the fulfillment of bondage, and the liberation of man.

Be aware that the flow of light that comes down into the physical planes as the inner light consciousness, or as the mystical traveller consciousness, or as a sound vibration of light and sound, the holy nod; all of these expressions are one, and all of them are the divine love of God. This is the principle upon which all major philosophies of the mystical traveller, of the inner light consciousness, and of the holy shabd(?); it is love. This is why we express through those entities who serve us in this world in divine love. The soul that manifested is beloved John, and throughout all other incarnations has been such a one who gives divine love without question, often times without even being aware that it is manifested through him (through the soul when I speak of him, not through the individual necessarily).

So let the major purpose of the organization, and of any organization such as this be love. For if love is not present, God is not present. There is no way one can find divine light without divine love.

We do not want you to force energy into manifestation. We want you to let it come into blessings of light as a flower begins to grow from a bud and blossoms forth as a flower, so let this energy come forth

and blossom slowly. But be aware that a flower can open within an hour, rather than over a period of a week. This flower is <sup>now</sup> beginning to open very, very rapidly. For the time is now that the flower essence needs to be manifested upon the physical planes. We bring this about because of the fact that J.R. is unable to handle all of the great souls that are coming unto him, and bringing them into light. Each master of inner light has a certain number of souls that are marked for him. It is only those souls he can take unto him, and yet now J.R. is drawing many more than he has marked for him. So it is time now for yet another part of him, that of Jim to come forth and take upon those that are marked for God as well. This will help to uplift yet even more. In order to do this, the soul itself is being uplifted, and each in its consciousness is being uplifted, so that the marked ones can be taken up into the light, into the inner light.

With this organization that we are trying to develop, let it slowly develop. Slowly, we mean, over the next year. We would appreciate if it could be developed within the next two years at the most. At that time, the five year limitation period of growth within the Foundation would have come to an end, and its greater service outward will truly begin to focus in the world. At that time, it will be necessary, as well, that a spiritual organization as a balancer of that service to the outer, be developed, so that we can begin to do the greater work of spirit to help keep balanced the ~~own~~ <sup>outer</sup> focus of the Foundation. If we do not have that balance, the outer focus of the Foundation will be waned outwardly, too much an energy. There will not be enough energy

flowing to this vehicle and to the spiritual organization to keep a balance. We must remember the scales must always be balanced. The energy must come to a neutral point in order for the straight and narrow path of light to flow. This is what we are dealing with here: that balancing of the scales; that of spirit, and that of the physical. If these two are not brought into bounds at all times and one outweighs the other, then truly, you are going to have an imbalance of flow, and something will happen that will cause problems within either the organization or the organization of spirit.

The spiritual organization is the soul. We, the masters of inner light are the divine essence of God within. The organization of spirit that we are trying to bring about at this time does not have to be totally functional in the sense that there has to be teachers on the road, buildings, property, publications presented; but it needs to be set up on paper and in function of flow of energy in order for it to manifest in abundance of spirit. Just as the Foundation had to be first drawn up on paper, be set about financially, and people began to think about what the next move should be, so it is now time to give birth to the spiritual organization to keep in focus the balancer.

Now, we leave. We impart unto you great blessings of light. May the radiant sound and light current be ever manifested within your soul, and may it lift you into the spirit of God, and beyond into the inner light. So let it be.
